Founded in 1996 in Seville, Margaret de Arcos Taller de Seda is a company specialized in hand-painted natural silk painting. Our pieces are made by using both traditional oriental techniques and high-resolution stamping methods.

Punto de interés Artesanal

Our products hold as the heart of all them a top quality natural silk, both stamping and artisan pieces, created under the leadership of Camila Puya de Arcos, artisan and designer, and her team. Silk is valued since ancient times due to its luminosity and beauty, its softness, fall and resistance and its ability to change and improve appearance when painted.

Value and exclusivity are added to the final product by customizing our clients' orders to their requirements and by our original own designs, as well as by including original motifs, applying the essence and features requested by our customers, as well

as presenting the final product in accordance with their requests.

In this catalogue, we present a selection of our articles, elaborated by combining innovative processes and a refined artisan technique. Every piece is preserved and produced individually, meeting high quality standards, allowing us to deliver customized articles with exclusive designs and an exquisite presentation. They are mainly created for institutions, corporate gifts and museum stores.
